

Java

```
class Solution {  
    public int eliminateMaximum(int[] dist, int[] speed) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number[]} dist  
 * @param {number[]} speed  
 * @return {number}  
 */  
var eliminateMaximum = function(dist, speed) {  
  
};
```

C++

```
class Solution {  
public:  
    int eliminateMaximum(vector<int>& dist, vector<int>& speed) {  
  
    }  
};
```

C#

```
public class Solution {  
    public int EliminateMaximum(int[] dist, int[] speed) {  
  
    }  
}
```
